## PROS AND CONS OF BILINGUAL SCHOOLS IN SPAIN

Nowadays it's a well-known fact that learning English is something very crucial in order to find a job in the future of the students. However, there are both positive and negative aspects <sup>about</sup> of the Bilingual Schools in Spain.

On the one hand, we live in a world of new technologies and communication, so being in a Bilingual School gives you the opportunity to keep a conversation with people from other countries. For example, there are ~~many~~ <sup>many</sup> jobs <sup>wh</sup> with need people who can talk with foreign businessmen.

On the other hand, there are students not very strict and responsible, with the ~~the~~ subjects they don't like or the subjects they are bad at, and in Spain there are ~~very~~ many pupils that don't pass English. If they don't understand the language, how can they understand all the subjects like History or Geography in that language?

In balance, I would say that if you ~~can~~ want to have a good job in the future, you must be motivated with learning English, and being in a Bilingual School will help you.
