**Motivate your students**

To encourage your students to make predictions before they read, ask them to close their books after exercise 1 and work with a partner to predict five nouns and five verbs that they think will be in the text. Tell them you are going to see who can make the most accurate predictions, and tell them they cannot choose very obvious words such as have or do. When students have made their predictions, tell them to read the text quickly to check how many words they predicted correctly. See who predicted the most accurately.

2 Remind students that they should read the text slowly and carefully before they answer True or False questions. Students read the text and answer the questions.

**ANSWERS**
1 False. ‘The programme was filmed over three weeks at a private girls’ school … while it was closed for the summer holiday.’

Culture note: British schools

There are different types of schools in Britain. This is because education is controlled by each county (region), so some counties have slightly different systems. These are the main words students may come across:

Secondary school: a school for pupils aged 11–18.
Comprehensive school: a secondary school for all pupils, of all abilities.
Grammar school: (in some areas) a secondary school that pupils can only go to if they pass an academic exam at the age of 11. If they fail the exam, they go to a different school called a secondary-modern school.
State school: a school that is funded by the government so pupils don’t have to pay fees.
Private school: a school for which students pay fees.
Public school: in Britain, a private school. The name public school is given to the traditional private schools that have existed for hundreds of years. Originally they were called public schools because they were open to anyone, as long as they could pay!

Note that in the US, schools funded by the government are called public schools.

Activity

You could read this information to students and then encourage them to compare the system in Britain with the one in their country. Alternatively, you could write the types of schools on the board and put students into pairs to either guess the meanings or look them up in dictionaries or on the internet.
Hey, teacher ... leave us kids alone!

A Can you imagine being in charge of your own school? If you had to teach a class of rowdy twelve-year-olds, how would you get on? Would the result be academic excellence or complete anarchy?

B In a recent social experiment for a BBC documentary, a group of ordinary teenagers were given the challenge of setting up and running their own school for a lively group of thirty kids. The programme was filmed over three weeks at a private girls’ school in Surrey, in the south of England, while it was closed for the summer holiday.

C The ‘teachers’ were expected to manage a budget, feed the pupils, put on activities and entertainment and have meetings with the pupils’ parents, as well as give lessons in academic and creative subjects. To make sure standards were maintained, the school had regular inspections and the students were made to sit exams to observe their progress.

D Of the thousands of teenagers who had applied to take part, the final twelve were selected on the basis of their radical ideas for changing the education system. Each had a point to get across: Bilal, for example, a seventeen-year-old insurance clerk from London, wanted to use the opportunity to challenge the negative image of teenagers that is portrayed in the media. Sam, also seventeen, had dropped out of his A level studies. He says his teachers lacked motivation, seeing teaching simply as a nine-to-five job. He wanted to show them how the job should be done.

E So how did they get on? The kids were very motivated by their new young teachers, who proved themselves caring, enthusiastic and energetic. The inspectors also felt the team had great potential and were impressed by the original methods they used to liven up their classes. A history lesson on the English Civil War, for example, was acted out by the pupils, who carried coloured balloons – the blue being the parliamentarians and the red the royalists. As a result, they remembered not only the facts but also the thoughts and opinions behind them.

F The teenagers themselves learnt several important lessons. Eighteen-year-old Hannah, who had been elected head teacher, said that she had never imagined how incredibly tiring and frustrating it is to have to meet the constant demands of pupils and the school management. But most importantly they learnt about themselves and the potential they had to influence others. As they realized how much the pupils looked up to them and wanted to be in their school, their confidence grew and grew.

G And did the teens teach the professional teachers anything? Yes – the teenagers showed the teachers that, when they are allowed a say in what and how they are taught, they can be extremely enthusiastic, responsible and motivated. They would rather be given responsibility for what they learn than be lectured at.

Extra activity: Grammar practice

Tell students they are going to write quiz questions to test each other. Divide the class into two teams. Within the teams, put students into pairs and tell them to prepare three questions, using either active or passive forms, e.g. Who won the World Cup in 2006? / Who was the World Cup won by in 2006?

Tell them they must also write the answers, using the appropriate form (active for active questions, passive for passive questions).

Choose one pair to read out one of their questions. The other team has 30 seconds to produce an answer which is factually and grammatically correct. If they get the right answer, they get a point. Continue choosing pairs from first one team then the other. The team with the most points wins.

Motivate your students

To encourage students to read the text through for general meaning first, ask this question: What does the text tell us about Einstein’s life? Students read the text quickly and answer the question. (He was rebellious at school, but he got very good grades.)

A discussion essay

What is a discussion essay?

In a discussion essay, you present two sides of an argument. The task may be presented as a statement as in the task below, or as a question, for example, ‘What are the advantages and disadvantages of …?’ You conclude by giving your personal opinion.

1 Read the task and think of two advantages and two disadvantages of school uniforms.

**TASK**

‘Students should be allowed to choose what they wear to school. Uniforms should not be compulsory.’ Discuss.

2 Read the essay. Are your ideas from exercise 1 mentioned? Is the writer for or against school uniforms?

A In many schools pupils are required to wear a uniform. However, there are arguments both for and against it.

B One of the main advantages is that students can get ready in the morning more quickly if they do not have to choose what to wear. Another argument in favour of uniforms is that pupils are not under pressure to keep up with the latest fashions. In schools without uniforms, students are sometimes bullied because of the way they dress.

C On the other hand, wearing a uniform stops people expressing their individuality. Moreover, uniforms are often uncomfortable and it is essential for students to feel comfortable in order to study well.

D On balance, I would say that although they prevent students from being able to express themselves, uniforms should be worn in schools. However, I strongly feel that they should be more comfortable than many uniforms currently are.

Exams are thought to be a bad way of assessing people because they can cause too much stress. In addition, if you do not perform well it can affect your chances of getting into university. However, they are a very good way of testing many students together quickly and efficiently. In my opinion, I do not think they should be abolished.

Extra activity: Constructions and full forms

If your students need more practice of using full forms rather than constructions, dictate these sentences to the class and ask students to rewrite them using full forms.

1 I’m sure you’ll agree with me.
2 It’s a good idea.
3 They shouldn’t be taught together.

But they’re a really good way of testing loads of students together quickly and efficiently. So, if you ask me, I don’t think we should abolish them.
